### **Profile**

Big believer in lifelong learning and my main focus is on javascript, but I'm constantly adding programming languages and technologies to my stack. I'm a highly motivated JavaScript developer with a passion for building innovative and user-friendly applications.

## **Skills**

### **Programming Languages**

Javascript, Typescript, CSS, Sass, Swift.

### **Libraries / Frameworks**

React, React Native, Next.js, Angular, Node.js, Express, Astro, Tailwind, Bootstrap.

### **Tools / Platforms**

Vercel, Netifly, Git, GitHub, Firebase.

### **Database**

SQL Server, MongoDB, Postgres, Firebase.

# **Education**

2023 - Swift course

developer.apple.com

2023 - Node.js course

udemy.com

2022 - Typescript course

microsoft.com

2021 - GraphQL course

apollographql.com

2020 - Javascript/ReactJS course wesbos.com

# **Interest**

Music, guitar, volleyball, calisthenics, animal shelter.

# **Cesar Gomez**

A software developer with love of beating personal beats

# **Relevant Experience**

Feb 2020 - Present

# **Software Developer**

### Innovate on Demand

- Deliver high-quality, scalable, and maintainable applications for multiple clients related to the automotive industry.
- Enforced healthy codebase coding style and standards by applying best practice and design patterns.
- Collaborate with UI/UX designers to achieve the product direction.
- Collaborate with Backend team in research, planning and architected to store, transform, load and present the data to the client.

Jan 2023 - Jun 2023

# **Full stack Developer**

#### Neurotic

- Build learning platform, reviewing and refactoring existing code into high quality code, ensure the best performance and usability of the applications on different platforms such as mobile and web.
- Planning and architected backend to store and consume data via GraphOL.
- Clean and eliminate dead code to save unnecessary boilerplate to decrease the pages bundle size.
- Enforced healthy codebase coding style and standards.

Oct 2018 - Jan 2022

# **Data Analyst**

#### CDK Global

- Monitoring, prevent and resolve potential error as well as fixing issues from existing ETL process.
- · Master data, management user and roles.
- Provide quality assurance of imported data.

Oct 2015 - Jan 2020

# **Data Analyst**

#### Innovate on Demand

- Delivery high-quality and reliable reports data to multiple clients related to the automotive industry.
- Prevent and resolve potential error as well as fixing issues from ETL process.
